Chapter on safety and quality discusses medication errors, specific nursing measures to promote safety, National Patient Safety Goals, and many other safety issues and concerns. Cultural considerations icons highlight important cultural considerations in the Nursing Process sections. QSEN focus emphasizes patient-centered care, safety, quality, and collaboration and teamwork. Application-level NCLEX Study Questions at the end of each chapter help prepare readers for the growing pharmacology coverage on the NCLEX Examination. Consistent RN-standard chapter pedagogy includes objectives, outlines, key terms with page references, and activities on the Evolve companion website. Coverage of prioritization throughout the text helps readers learn to prioritize nursing care and differentiate need-to-know from nice-to-know content. **NEW!** Streamlined content and improved organization makes this edition even more user-friendly. **NEW!** Patient Safety boxes reinforce concepts related to medication safety, and more. **NEW!** New chapter on Transplant Drugs discusses key drugs prescribed for organ transplants. **NEW!** Updated Prototype Drug Charts provide easy access to key information for the most commonly used drugs, including dosages, contraindications, drug-lab-food interactions, pharmacokinetics, and more. **NEW!** New pregnancy categories regulations are addressed in all chapters where pregnancy categories were mentioned. **NEW!** Additional QSEN icons will be included in boxes that discuss patient-centered care, teamwork and collaboration, evidence-based practice, quality improvement, safety, or informatics. **NEW!** Expanded chapter on cultural considerations now includes new information on community-based nursing content. **NEW!** Complementary and Alternative Therapies boxes (formerly Herbal Alert boxes) more appropriately reflect the content, which covers more than just safety information. **NEW!** New or updated Critical thinking case studies are included at the end of every chapter to challenge readers to apply knowledge and analytical skills to realistic patient scenarios.
